

## YOUR CHALLENGE

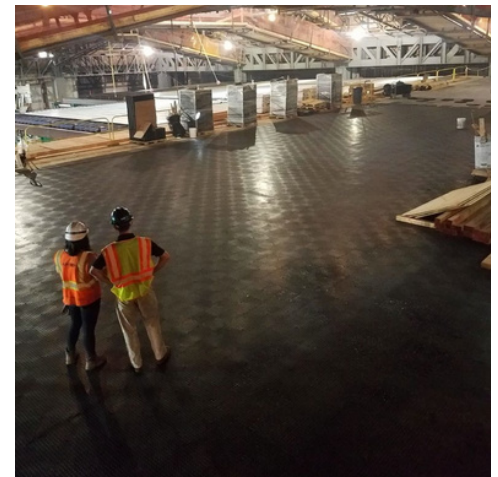

Protecting the roofing membrane from machinery, traffic and trade work during construction and renovation. Reducing the financial risk that comes from unforeseen rework, repairs and delays.

## OUR SOLUTION

# Rhino Tile® FR

- Lightweight and easy to transport to any area on site without the use of cranes
- Safe to handle, cut and install without the use of specialty trades
- Interlocking tiles require zero mechanical fastening making installation extremely efficient
- UV, chemical and solvent resistant
- Tested and approved against wind uplift up to 75mph
- Manufactured from durable PVC so won't warp in extreme weather
- Slip resistant, embossed surface reduces opportunities for slips/trips
- Flame-Retardant
- Reusable-move from one part of the jobsite to the next, even from one jobsite to the next
- Recyclable and manufactured from recycled materials

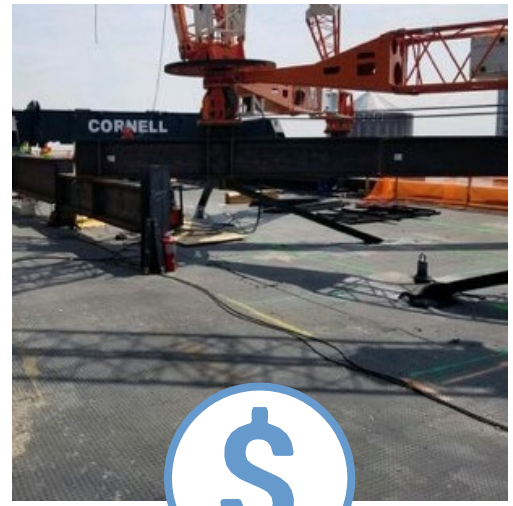

## PROTECT YOUR PUNCHLIST

- Resists punctures and tears
- Supports extremely heavy point loads
- Defends surfaces from years of trade work
- Reduces the risk of rework or repairs to the roofing membrane
- Saves time and money

## PROTECT YOUR TIMELINE

- Lightweight and easy to transport, freeing up labor and machinery to handle other tasks
- Interlocking tiles snap into place quickly, without the need for mechanical fastening, to prep the surface for work sooner
- Saves time and money

## PROTECT YOUR BUDGET

- Withstands years of heavy traffic, machinery and weather without warping
- No need to replace materials
- No need to waste labor maintaining or relaying temporary protection
- Saves time and money

# RETHINKING TEMPORARY PROTECTION

“On the Moynihan project, Mira [Roofing Co, Brooklyn] would have taken 80 man-hours to install plywood, and with Rhino Tile, that was reduced to 30 hours. That is a huge saving!”

-Project Lead on Skanska site Manhattan, USA
