

- Resists punctures and tears
- Supports extremely heavy point loads
- Defends surfaces from years of trade work
- Reduces the risk of rework or repairs to the roofing membrane
- Saves time and money

- Lightweight and easy to transport, freeing up labor and machinery to handle other tasks
- Interlocking tiles snap into place quickly, without the need for mechanical fastening, to prep the surface for work sooner
- Saves time and money

- Withstands years of heavy traffic, machinery and weather without warping
- No need to replace materials
- No need to waste labor maintaining or relaying temporary protection
- Saves time and money

RETHINKING TEMPORARY PROTECTION

On the Moynihan project, Mira Roofing Co, Brooklyn would have taken man-hours to install plywood, and with Rhino Tile, that was reduced to hours. That is a huge saving

-Project Lead on Skanska site Manhattan, USA
